STUDY STRATEGIES

Learners use a great variety of strategies to attack their training. Here are some options you can choose from to get the most out of your training experience:

- Proceed through all CBT Nuggets video training on double-speed to develop a strong overview of the material; Then proceed through all the training for a second time, taking good notes and focusing on deeper learning.
  OR
- Proceed through all CBT Nuggets video training, taking good notes and focusing on deep learning on the first pass; Then proceed back through all training a second time, using double-speed when appropriate.

Supplement all video training with book study and practical application of knowledge.

Develop a test environment where new skills can be practiced.

PRACTICE EXAM STRATEGIES

CBT Nuggets offers practice exams as part of your subscription. You can take the practice exams as many times – and as often – as you like! Here are some tips to help you take full advantage of this excellent resource:

1. PLAN TO TAKE THE PRACTICE EXAM 3 TIMES

FIRST EXAM
Create a baseline against which you can measure your progress with future exams.

SECOND EXAM
Measure your progress since your first practice exam! Ask yourself: Are you retaining the information and material you learned at the beginning of your training? Are there areas to which you should return now to ensure your understanding before moving forward?

THIRD EXAM
Measure your progress against your first two practice exams! Ask yourself: Are you scoring 90% by now? If so, you might be ready for the real thing!

The results from your second practice exam experience should help you identify areas where you may need to spend extra effort and energy in the training ahead.

Allow the results from your practice exam to direct your review ahead of your certification exam. Ask yourself: Are you retaining all the material? And are you understanding it well?
The Extra Mile section of your study plan challenges you to dig a little deeper with your training. The Extra Mile might be a textbook recommendation, supplemental materials downloads, or other resources to help you take your training to the next level. Nothing in the Extra Mile is required, but it is here to help you learn.
OSI Layers, Ports & Protocols:
1. A Tale of Two Kings
2. The 7 Layers of the OSI Model
3. TCP/IP Suite Layers
4. Core TCP/IP Protocols
5. Wireshark Views of Core TCP/IP Protocols
6. How Ports Are Used in TCP/IP
7. Verifying L4 Ports with Wireshark
8. Common Protocols and Their Well-known Ports
9. TCP’s Three-way Handshake
10. Wireshark Verification of a TCP 3-Way Handshake

Ethernet Switching:
11. Properties of Network Traffic
12. Layer 2 Ethernet Addresses
13. How a Layer 2 Switch Works
14. Demonstration: Switch Dynamic Learning
15. Understanding VLANs
16. Configuring a VLAN
17. Overview of 802.1Q and Trunks
18. Configuring an 802.1Q Ethernet Trunk
19. How Address Resolution Protocol (ARP) Operates
20. Predicting the MAC Address Table

Ethernet Switching, cont.:
21. Validating MAC Address Table Predictions
22. Game: Predict MAC Table After PC1 Pings PC4
23. Game: Predict MAC Table After PC3 Pings PC5
24. Switching Loops and Spanning Tree Protocol (STP)

EXTRA MILE
Take the Practice Exams! Use the results to drive your ongoing study.*

*Keep in mind that you’ve just started the training so you probably won’t ace the exam. This is just to establish a benchmark for future practice exam performance.
Ethernet Switching, cont.:  14 min.
25. STP Reacting to a Network Change  6 min.
26. Design Considerations and PoE  5 min.
27. Switch Port Mirroring  3 min.

IP Routing and Forwarding:  61 min.
28. Introduction to IP Routing  6 min.
29. How to Train a Router  5 min.
30. Options for Static Routes  6 min.
31. Configuring Static Routes  5 min.
32. Dynamic Routing Protocol Overview  5 min.
33. Dynamic Routing Protocol Demonstration  3 min.
34. Address Translation with PAT  5 min.
35. One-to-one Translations with NAT  4 min.
36. Using Wireshark to Verify IP Translations  5 min.
37. Access Control Lists  6 min.
38. ACL Demonstration  5 min.

IP Addressing and Subnetting:  12 min.
40. IPv4 Overview  6 min.
41. Binary Basics  6 min.

IP Addressing and Subnetting, cont.:  50 min.
42. Converting Decimal to Binary  6 min.
43. Converting Binary to Decimal  6 min.
44. The IP Mask  6 min.
45. Practice Using a Different IP Mask  5 min.
46. Borrowing Host Bits  16 min.
47. Practicing the Finger Game  5 min.
48. Identifying New Subnets  6 min.

EXTRA MILE
Download CBT Nuggets apps to your various devices so you can have your training with you when you’re on the go!
IP Addressing and Subnetting, cont.: 44 min.

49. Exercise 1: Identify the New Subnets 6 min.
50. Exercise 2: Identify the New Subnets 3 min.
51. ID Valid Host Addresses on a Subnet 6 min.
52. Exercise 1: ID Valid Host Addresses 6 min.
53. Exercise 2: ID Valid Host Addresses 6 min.
54. Calculate the Number of Hosts per Subnet 6 min.
55. Determine the Subnet Based on a Host’s IP Address 6 min.
56. Planning and Assigning IP Addresses 6 min.
57. Test Your IPv4 Knowledge Lab 11 min.
58. IPv6 Concepts 6 min.

Wireless Technologies and Configurations, cont.: 45 min.

65. Understanding Radio Frequency 7 min.
66. Understanding Radio Channels 9 min.
67. Wireless Communication Technologies 7 min.
68. Designing for Wireless Speed and Coverage 9 min.
69. Understanding Wireless Antennas 6 min.

Network Topologies: 29 min.

59. Wired Topologies 7 min.
60. Wireless Topologies 5 min.
61. Types of Networks 6 min.
62. Introducing the Internet of Things (IoT) 6 min.
63. Internet of Things (IoT) Technologies 5 min.

EXTRA MILE
Create flashcards to aid in your learning. Or, use flashcard services out there like quizlet.com to ensure you are getting all that you can out of your training!
